

ORDER FORM

FARM-GATE BIOSECURITY SIGNAGE

The farm-gate biosecurity signs have been designed to encourage all personnel entering non-consumer facing vineyard entrances to contact the manager before entering. Pests, diseases and weeds harmful to grapevines can be picked up and spread via tyres, equipment, machinery, shoes and clothing. Signage specifically designed for cellar door and consumer-facing entrances are also available: please see our website for details www.vinehealth.com.au

Two sign options are available, in two sizes. Signs are printed on aluminum with non-reflective UV coating and 4 pre-drilled holes. The manufacturer advises optimal presentation for minimum 5 years.

The Mandarin text reads: 'Without permission, you may not enter'.
