## GROWER DISINFESTATION KIT

**\$150.00** + GST & DELIVERY

The Grower Disinfestation Kit provides you the tools and instructions to conduct effective footwear disinfestation. Pests, diseases and weeds harmful to grapevines can be picked up and spread via footwear and clothing. Disinfesting footwear is one option to ensure safe shoes. Another is to provide alternative footwear such as rubber boots or heavy duty boot covers. The Grower Kit enables you to put in place best practice measures to minimise the spread of pests, diseases and weeds via visitors to your vineyard.

**Included in each kit:** a comprehensive guide to setting up and correctly using a disinfestation station; required equipment for footwear cleaning; protective footwear alternatives; disposable suit; and links to extensive information on best practice measures to protect your vines.
