

VINEHEALTH AUSTRALIA STRATEGIC AGENDA 2021 TO 2026 AT A GLANCE

Vinehealth Australia is an independent statutory authority in South Australia. Our purpose is to foster a profitable, sustainable and reputable grape and wine industry, by working alongside growers, winemakers, propagation specialists and government to protect vines from biosecurity risk and to advance vine health.

TARGET

A stronger, active defence against vineyard pest threats, with biosecurity practices integrated into everyday operations and access to high-health planting material.

TARGET

The impact of an incursion on assets, people and profitability is minimised, providing business continuity for growers, winemakers and other entities along the supply chain.

TARGET

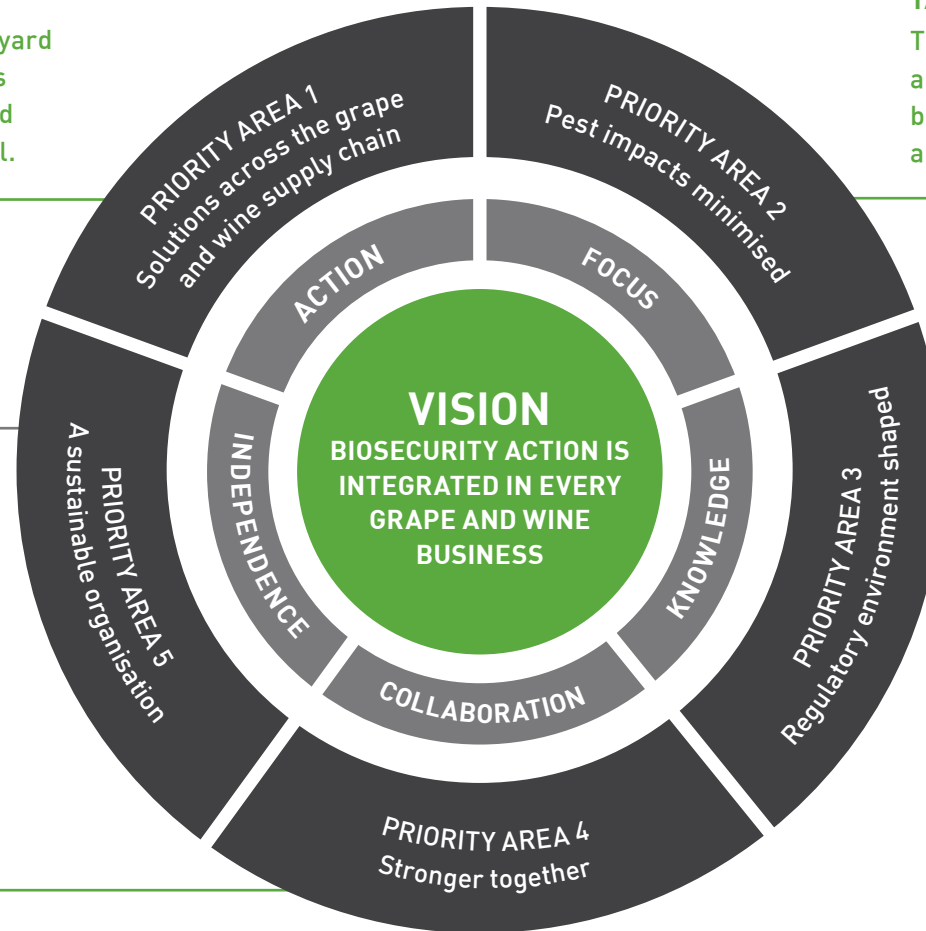

A sustainable organisation with expertise, systems and resources, that delivers exceptional outcomes.

TARGET

A responsive and robust biosecurity regulatory system, respected and complied with by industry.

TARGET

An active and connected network across the South Australian grape and wine supply chain, with impact and results extending across the country.

OUR FUNDING JUNCTURE

Our investors, vineyard owners, currently contribute a total of \$740,000 per year to fund biosecurity activities. The contribution rate has remained unchanged since 1996 despite increasing biosecurity challenges and costs of doing business.

For the next three years and through conversations with industry and government, a key priority for Vinehealth Australia will be to realise a new funding approach.
