CELLAR DOOR DISINFESTATION KIT

\$195.00 + GST & DELIVERY

The Cellar Door Disinfestation Kit provides you the tools and instructions to conduct effective footwear disinfestation. Pests, diseases and weeds harmful to grapevines can be picked up and spread via footwear. Disinfesting footwear is one option to ensure safe shoes. Another is to provide alternative footwear such as rubber boots or heavy duty boot covers. The Cellar Door Kit enables you to put in place best practice measures to minimise pest, disease and weed spread via visitors to your cellar door.

Included in each kit: a comprehensive guide to setting up and correctly using a disinfestation station; required equipment for footwear cleaning; protective footwear alternatives; and links to extensive information on best practice measures to protect your vines.
